

CITEPAYUSA POINT-OF-SALE SOLUTION

THE INTEGRATED SOLUTION FOR ACCEPTING AND MANAGING OVER-THE-COUNTER CARD PAYMENTS

Our Point-of-Sale solution makes it easy and convenient to accept and manage credit card and debit card payments over-the-counter—and then automatically update your FullCourt® or FullCourt *Enterprise*™ case management system.

There are many advantages to accepting card payments over-the-counter using the CitePay Point-of-Sale Solution:

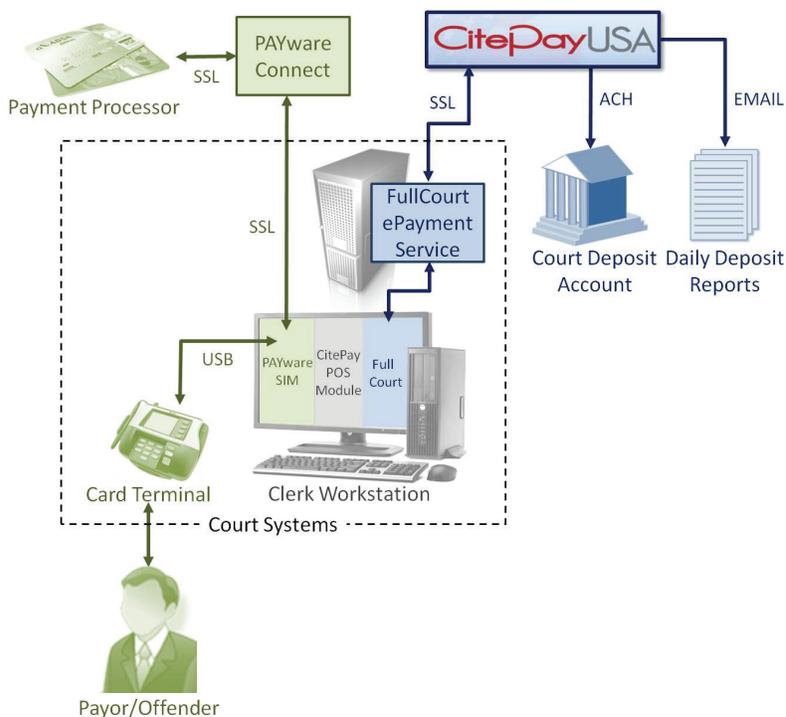

- Card payments make it easier and more convenient for your constituents to pay court financial obligations.
- Reduces the need to handle cash.
- Decreases check fraud and the need to wait for checks to clear.
- Increases revenue and significantly reduce your court's accounts receivable.
- Further lessens the burden on those collecting and processing payments.

CitePayUSA incorporates VeriFone® technologies to bring all of these benefits to your court—without having to worry about technical details or high up-front costs. Our solution includes everything you need to begin collecting, processing, and managing over-the-counter card payments quickly and efficiently—including card terminals, a trusted payment processing service that securely completes the transactions and then deposits the funds in your account, and a module that automatically updates your FullCourt and FullCourt *Enterprise* solution when payments are collected. Our Point-of-Sale solution includes the VeriFone PAYware SIM software, PAYware Connect gateway, and the MX900 series Card Terminals, which have chip-reader (EMV) capability.

POINT-OF-SALE IN ACTION

Our Point-of-Sale solution operates seamlessly with your existing FullCourt *Enterprise*. Here's how it works:

1. When a Payor is ready to make a payment over-the-counter, the Clerk opens the Payment page in FullCourt *Enterprise*.
2. The card terminal will display the court fines/fees amount, the transaction fee, and the total amount.
3. The Payor then swipes the card through the terminal.
4. The card terminal passes the payment information to the PAYware SIM software, which communicates with the PAYware Connect gateway through secure 128-bit SSL encrypted connections.
5. PAYware Connect processes the payment with the Payment Processor via cloud-based, PCI-compliant payment services
6. Once the payment is processed, the Clerk is informed whether the payment was authorized or declined.
7. If authorized, a receipt is generated internally within FullCourt *Enterprise* and can be printed for the Payor.
8. The payment automatically updates FullCourt *Enterprise* and CitePayUSA.
9. The money is transferred to the Court's Deposit Account (within two business days), and the transaction is included in the Daily Deposit Reports.

A COMPLETE PAYMENT SYSTEM

Point-of-Sale Solution Features:

- Fully Integrated with FullCourt *Enterprise* and CitePayUSA
- Payment Automatically Updates FullCourt *Enterprise* and CitePayUSA
- Generate Receipts with an Invoice Number
