

ePAYMENT SOLUTIONS

MAKING IT EASY, CONVENIENT, AND AFFORDABLE FOR YOUR COURT TO ACCEPT AND MANAGE ONLINE PAYMENTS

The advantages of accepting payments for certain fines and fees over the Internet are obvious. Online payments make it easier and more convenient for your constituents to pay fines and fees. They increase revenue and significantly reduce your court's accounts receivable. And they can dramatically lower the burden on those collecting and processing payments.

Justice Systems, working together with CitePayUSA, is ready to make all of these benefits a reality for your court. We can offer you a complete online payment solution that integrates flawlessly with your FullCourt *Enterprise* system. That means you gain all the advantages of accepting online payments quickly and painlessly—without having to worry about technical details or high up-front costs.

Our ePayment solution includes everything you need to begin collecting, processing, and managing payments over the Internet quickly—including a secure public-facing web interface, a trusted payment processing service that completes transactions and deposits funds in your account, and an ePayment module that automatically updates your FullCourt *Enterprise* solution when online payments are collected.

With our ePayment solution, individuals can use computers or mobile devices and the internet to find and pay their citations or court fines/fees. A citation number or case number and a date of birth is needed to retrieve a case. Parking citations may be retrieved by license plate number. When individuals retrieve their cases, they are informed of all their outstanding obligations and unresolved cases with the Court. CitePayUSA also allows them to pay on multiple cases in one transaction. To protect their security, CitePayUSA never collects or stores an individual's payment information.

JUSTICE
SYSTEMS®

"When we decided to go with CitePayUSA, we saw it would save a lot of clerical time because of its integration with FullCourt. We did not realize how much more effective it would make our Overdue Processing. That alone has made the court more efficient."

DANI SMITH
Administrative Assistant—Finance
61st District Court of
Grand Rapids, MI

EPayment IN ACTION

ePayment is a comprehensive online payment solution that operates hand-in-hand with your existing FullCourt *Enterprise* financial system. Here's how it works:

- Justice Systems provides an ePayment module to your existing FullCourt *Enterprise* system. This module allows you to specify which types of fines and citations can be paid online and efficiently manage your online payments.
- Individuals visit a convenient, secure website to view up-to-date information about their fines and fees and enter their credit card or e-check payment information. They will also enter pleas if so determined by the Court. These details are uploaded directly from your FullCourt *Enterprise* system and displayed in a way that makes sense to end-users. After the transaction is complete, visitors receive a confirmation message and electronic receipt that includes card authorization information, next payment due date, and details for remaining Court obligations.
- CitePayUSA processes payments and takes care of all the transaction details, including encryption and security following PCI-DSS security standards, credit card processing relationships, and fund transfers. The ePayment system automatically sends transaction information back to your FullCourt *Enterprise* system as soon as the transaction is complete.
- 100% of the funds owed the Court from completed transactions are deposited directly into your court's bank account. A nominal Automated Payment Service fee is charged to the payor.
- Powerful reporting capabilities make it easy to monitor and manage all your online payment activity. A detailed ACH report is provided for each ACH deposit.
- An optional kiosk allows you to set up convenient self-service payment stations in your offices.

ADDITIONAL FEATURES

- ePayment allows the following automatic functions in FullCourt *Enterprise* to be configured:
 - Enter a Plea and Plea date on the charges.
 - Enter Pleas for unresolved cases.
 - Enter the Finding and Finding date on the charges.
 - Assess default Fees and Fines on a case.
 - Post Register of Actions (ROAs) to the case.
 - Result hearings.
 - Set new payment due dates.
 - Change the case status upon payment in full.
 - Deny online payment based upon the rules of Overdue Processing, Collections, or Warrants.
 - Assess partial payment fees.
- Integrates with our FullCase system so prosecutors receive appropriate notifications of payments.
- Allows bonds to be posted through CitePayUSA, and electronically notifies designated parties.

FAST, EASY, AND AFFORDABLE

With Justice Systems and CitePayUSA, getting a complete ePayment system up and running is surprisingly easy and affordable. Our ePayment experts will work closely with you to design, implement, and configure the ideal solution for your court. We'll help you create a public-facing ePayment website—or add an ePayment component to your existing site. Best of all, in most circumstances there is little or no cost to the Court for training, setup, and configuration services.

SERVICE AND SUPPORT YOU CAN COUNT ON

When you choose our ePayment solution, you'll receive the same outstanding, personalized service and support you've come to expect from Justice Systems. This includes full installation and setup assistance, expert training on your ePayment system, and complete ongoing maintenance and technical support. Additionally, CitePayUSA provides a toll-free Help Desk to assist customers with questions regarding their transactions.
